

Case Study

Cheltenham College

Background

Cheltenham College has a long-term plan to provide additional facilities and rationalise their existing facilities (including car parking) as part of the future development of the college. The first element involved the provision of a new building for the Estates department, together with an extension to one of the sports halls. Cole Easdon Consultants (CEC) used their expertise to produce a Transport Statement and Travel Plan to support the college's planning application, enabling it to achieve planning consent rapidly.

Client

Cheltenham College

CEC Input

CEC carried out the following:

- Transport Statement to support the planning application for the new Estates building and sports hall extension
- Travel Plan to support planning application and future development aspirations
- Web based travel surveys which were used to support the Travel Plan
- Parking surveys of existing parking stock

Regular discussions were had with senior representatives of the college in order to agree the final content including specific Travel Plan measures, targets and objectives.

Benefits of Our Involvement

- CEC's pro-active approach enabled the Travel Plan to be signed off by the college, and the planning application submitted at the earliest opportunity.
- Following approval of the Travel Plan and Transport Statement by Gloucestershire County Council, the college achieved planning consent, and were able to proceed with the first phase of development.
- The college now has a comprehensive Travel Plan to support planning applications for future phases of development.
